GO!

In search of direction?

When alternative comes to your door:

1 Aspiring to be a professional

Develop your talents and learn the required skills, which will help building professional networks and increasing employment opportunities.

2 Exploring development goals

Try a learning method that is through direct application. With development opportunities, it could assist you in finding your own path and life goals.

3 Looking for learning modes other than traditional education

Try other learning methods and approaches, such as applied courses that are relevant to work, and practicing in sync with classroom learning.

4 Hoping to switch career path

While shouldering economic or family responsibilities, choosing low-cost training opportunities facilitates a smooth transition to a new career path.

Success can be achieved through various paths

There's no right or wrong, only whether it's suitable or not

Follow your own path and become a professional

41

Sharing by the Apprentices

During the apprenticeship training, I gained...

With a **guaranteed income** and the **tuition fee paid by the employer**, I can focus on learning and my career development.

I've **found my interests and skills**. Now my development direction is clear, reigniting my hope and confidence.

After applying what I've learnt in **practical situations**, I find it **easier to comprehend** the theoretical knowledge from the books.

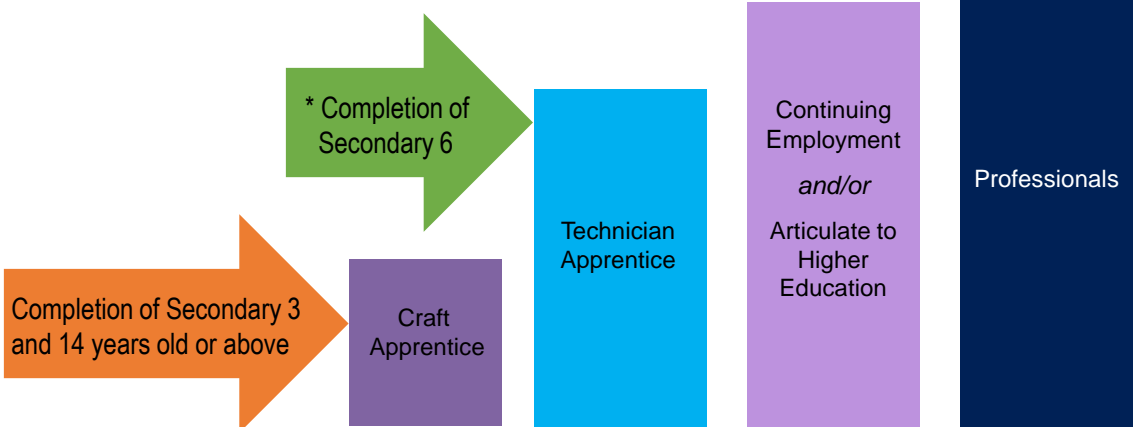

VTC matched me with a **suitable job and employer**, serving as a bridge for me to enter the industry.

Although we graduated at the same time, I already have **more full-time work experience**.

With the guidance and companionship of my mentors, I **swiftly adapted to the work environment** and quickly became proficient in my role!
